

Meggers Award Committee Report

This Committee has identified as the winning publication for the 2010 Meggers Award the following two papers merged into one entry:

Methods for Kinetic Modeling of Temporally Resolved Hyperspectral Confocal Fluorescence Images

Authors: Cutler, Patrick J.; Haaland, David M.; Andries, Erik; Gemperline, Paul J.

Volume 63, Issue 2, (February 2009), pp. 153-163

&

Systematic Method for the Kinetic Modeling of Temporally Resolved Hyperspectral Microscope Images of Fluorescently Labeled Cells

Authors: Cutler, Patrick J.; Haaland, David M.; Gemperline, Paul J.

Volume 63, Issue 3, (March 2009), pp. 261-270

The papers were merged into a single entry as discussing a very similar topic. The committee is confident that this work conforms to the high standard set by previous Meggers Award winners.

Pavel Matousek
Chair of Meggers Award Selection Committee
