

VI-A-Awards-SciX 2017

Awards Committee

The Barbara Stull Graduate award is going to David Bryce of University of Utah for his outstanding research in the area of Raman microscopy.

The Undergraduate Award will be given to Carolyn Borkowski of Purdue University for her research in laser and spark produced plasmas and Arianna Avellan of Purdue University for her research in the selection and characterization of a 3D printed hydrogel patch for spinal injury and nerve regeneration, the effect of irreversible electroporation and cold atmospheric plasma on different cancer cell lines, and the making of cellulose transparent paper from soft wood pulp.

.
The Awards Committee from 2016 nominated at the PITTCON 2017 meeting Dr. Terry Miller from University of Ohio for Honorary Membership and Dr. Geoff Coleman from Meinhard Glass and Dr. Brian Perry from Ohio State University for Distinguished Service.
